

Monitoring Data Record

Project Title: R-619EI (NC 281) COE Action ID: 200430595
 Stream Name: UT West Fork of French Broad River (Site 17) DWQ Number: 3498
 City, County and other Location Information: Transylvania County, NC 281 (Sta. 114+75 to 115+65), site is located approx. 1,050 feet east of Slick Fisher Road (SR 1306)
 Date Construction Completed: Completed construction on the channel change on May 22, 2008 and completed planting on May 25, 2010 Monitoring Year: (2) of 5
 Ecoregion: _____ 8 digit HUC unit 06010105
 USGS Quad Name and Coordinates: _____

Rosgen Classification: B

Length of Project: 90' Urban or Rural: Rural Watershed Size: _____
 Monitoring DATA collected by: M. Green and J. Young Date: 6/29/11

Applicant Information:

Name: NCDOT Roadside Environmental Unit
 Address: 1425 Rock Quarry Rd, Raleigh, NC 27610
 Telephone Number: (919) 861-3772 Email address: mlgreen@ncdot.gov

Consultant Information:

Name: _____
 Address: _____
 Telephone Number: _____ Email address: _____

Project Status: _____

Monitoring Level required by COE and DWQ (404 permit/ 401 Cert.): Level 2

Permit States: The permittee shall monitor the completed stream relocation in accordance with Monitoring Level 2 of the US Army Corps of Engineers, Wilmington District, Stream Mitigation Guidelines of April 2003. The monitoring reports, including reference photographs, plant survival data and visual inspection notes identifying specific problem areas, will be submitted to the Corps of Engineers, Asheville Regulatory Field Office within 60 days of completion of the monitoring. The monitoring report will also include a discussion of any deviations to channel stability. The success of the stream relocation as project mitigation will be evaluated based on those success criteria listed in the reference Stream Mitigation Guidelines.

Section 1. PHOTO REFERENCE SITES

(Monitoring at all levels must complete this section)

Total number of reference photo locations at this site: 3 photos were taken from 2 photo point locations

Dates reference photos have been taken at this site: 7/28/10, 2/8/11, 6/29/11

Individual from whom additional photos can be obtained (name, address, phone): _____

Other Information relative to site photo reference: _____

If required to complete Level 3 monitoring only stop here; otherwise, complete section 2.

Section 2. PLANT SURVIVAL

Attach plan sheet indicating reference photos.

Identify specific problem areas (missing, stressed, damaged or dead plantings):

Estimated causes, and proposed/required remedial action: _____

ADDITIONAL COMMENTS: Planted vegetation along the streambank consisted of pink azalea, yellow root, dog hobble, red oak, and rhododendron. Other vegetation noted onsite consisted of briars, sedge, lespedeza, juncus, jewelweed, alder, black willow, multi-flora rose, and blackberry. NCDOT proposes to discontinue plant survival monitoring at this site.

If required to complete Level 1 and Level 2 monitoring only stop here; otherwise, complete section 3.

Section 3. CHANNEL STABILITY

Visual Inspection: The entire stream project as well as each in-stream structure and bank stabilization/revetment structure must be evaluated and problems addressed.

Report on the visual inspection of channel stability. Physical measurements of channel stability/morphology will not be required. Include a discussion of any deviations from as-built and an evaluation of the significance of these deviations and whether they are indicative of a stabilizing or destabilizing situation.

UT to West Fork of French Broad River (Site 17) is stable for the Year 2 Summer evaluation. NCDOT proposes to discontinue channel stability monitoring at this site.

Date Inspected	Station Number	Station Number	Station Number	Station Number	Station Number
Structure Type					
Is water piping through or around structure?					
Head cut or down cut present?					
Bank or scour erosion present?					
Other problems noted?					

Section 4. DEBIT LEDGER

The entire UT West Fork French Broad River stream mitigation site was used for the R-0619EI project to compensate for unavoidable stream impacts.
